Experience

Oasis InfoByte

Web Developer & Design Intern

Mar 2023 – April 2023

Remote

- I have worked as web developer at oasis infoByte & worked on three basic projects.
- Developed a Calculator, Tribute Page and To-do List web application using HTML, CSS, JavaScript.
- Calculator is to calculate the numbers, Tribute page is to know about any person and To-do List to make a list and download it.

Projects

Fit-With-Fitness | Reactjs, Material UI, Rapid API — [Link](#)

Nov 2023

- Developed a modern React fitness exercises application with the functionality to choose exercise categories and specific muscle groups.
- Designed and implemented features including more than thousands of exercises available with practical examples, paginations, exercise details, pulling related videos from YouTube displaying similar exercises, and many more.
- Searching and filtering functionality is available to easily find specific exercises.

Make-Testy | Reactjs, Semantic UI, Axios API — [Link](#)

July 2023

- Developed a Food-Recipe web Application that includes various type of recipes to make food.
- Implemented features having to search recipes based on various functionality such as using specific terms, separated comma and ingredients.
- Each recipe page provides a comprehensive overview, including ingredients, step-by-step instructions and serving size.
- Recipe page also contain name of recipe provider, recipe url and publisher webpage.

SafarUp Repair Services | HTML, CSS JavaScript — [Link](#)

March 2023

- Created a Repair Services online website to book various of repairing services according to user customization
- Designed and implemented features including login and signup page, trending services, Services details, Client's Reviews and selecting product problems.
